

RULE 116 EMISSIONS STATEMENT AND CERTIFICATION
(Adopted 02/23/2010)

- A. Upon the request of the Air Pollution Control Officer (APCO) and as directed by the APCO, the owner or operator of any source operation which emits or may emit oxides of nitrogen or reactive organic gas shall provide the APCO with a written statement, in such form as the APCO prescribes, showing actual emissions of oxides of nitrogen and reactive organic gas from that source. At a minimum the emission statement shall contain as described in the ARB's Emission Inventory Guidelines <http://www.arb.ca.gov/ei/drei/create/guidance.htm>. The statement shall contain emissions for the time period specified by the APCO. The statement shall also contain a certification by a responsible official of the company that the information contained in the statement is accurate to the best knowledge of the individual certifying the statement. The first statement will cover 2009 emissions and shall be submitted to the district by December 2010. Statements shall be submitted annually thereafter.
- B. The APCO may waive this requirement to any class or category of stationary sources which emit less than 25 tons per year of oxides of nitrogen or reactive organic gas if the district provides the Air Resources Board with an emission inventory of sources emitting greater than 10 tons per year of nitrogen oxides or reactive organic gas based on the use of emission factors acceptable to the Air Resources Board.
- C. All official documents submitted to the Air Pollution Control District (APCD) shall contain a certification signed and dated by a responsible official of the company. This certification must attest that the information contained in the submitted documents is accurate to the best knowledge of the individual certifying the submission. The requirements of this Section apply to, but are not limited to, the emissions statements required in Section A of this rule.
